RULING ON ENTITLEMENT¹

On January 8, 2020, Paoshoua Vue filed a petition for compensation under the National Vaccine Injury Compensation Program, 42 U.S.C. §300aa-10, *et seq.*² (the “Vaccine Act”). Petitioner alleges that her receipt of an influenza (“flu”) vaccination on October 26, 2018 caused her to develop a shoulder injury related to vaccine administration (SIRVA). Petition at 1, 4. The case was assigned to the Special Processing Unit of the Office of Special Masters.

dysfunction of the affected shoulder prior to vaccination; that Petitioner more likely than not suffered the onset of pain within 48 hours of vaccine administration; that Petitioner's pain and reduced range of motion were limited to the shoulder in which the vaccine was administered; and that there is no other condition or abnormality present that would explain Petitioner's symptoms. *Id.* at 8-9. Respondent further agrees that Petitioner received her vaccination in the United States and that Petitioner suffered the residual effects of her injury for more than six months after vaccine administration. *Id.* at 9.

In view of Respondent's position and the evidence of record, I find that Petitioner is entitled to compensation.

IT IS SO ORDERED.
